PROFESSIONAL SUMMARY

Full Stack Developer with experience in React, Flutter, and database management. Passionate about creating scalable web applications and AI integration.

EDUCATION

Air University

Bachelor of Science in Computer Science

Islamabad, Pakistan

Sep. 2023 – Present

EXPERIENCE

Shopify Store Manager

Magasin Daata

Apr. 2025 – Present

Quebec, Canada, Remote

- Architected a custom Shopify storefront using **Liquid templating** and CSS, ensuring brand consistency
- Engineered custom **JavaScript** modules for dynamic cart drawers and product filtering
- Optimized site performance and SEO metadata, achieving a **90+ Google PageSpeed score**
- Streamlined inventory operations by automating workflows, managing over **100+ SKUs**

PROJECTS

Manzil Media (Client) | React, Framer Motion, GSAP, Tailwind

June 2025 – Sep. 2025

- Built high-performance React/WebGL portfolio maintaining **60fps animations**
- Engineered GSAP components achieving **95+ Lighthouse scores** via code splitting
- Integrated EmailJS & JSON-LD for **zero-latency** forms and optimized SEO
- Delivered mobile-first architecture with **100% accessibility compliance**

Fight House (Client) | WordPress, WooCommerce, Google Maps API

Nov 2025 – Present

- Developed a comprehensive fitness platform featuring dynamic **Class Schedules** and gym descriptions
- Integrated **WooCommerce** to engineer a fully functional e-commerce shop for merchandise sales
- Implemented **Google Maps API** within the Contact module for interactive location tracking
- Designed a **mobile-responsive architecture** ensuring 100% accessibility across all devices

E-Commerce Clothing Store | React, MongoDB, JavaScript, HTML/CSS

Apr. 2024

- Built complete online clothing store using React frontend and MongoDB database integration
- Implemented user authentication system with secure login and registration functionality
- Developed product catalog with search, filtering, and dynamic product display features
- Created responsive shopping cart and checkout system with order processing capabilities

Music Player | C++, HTML/CSS, JavaScript

Dec. 2024 – Jan. 2025

- Developed web-based music player with C++ backend for audio file management and processing
- Created intuitive frontend interface using HTML/CSS and JavaScript for music controls
- Implemented playlist functionality and audio streaming capabilities with data structure optimization
- Integrated file upload system and metadata extraction for comprehensive music library management

Fitness Tracking Mobile Application | Flutter, Firebase, Dart

Nov. 2024 – Jan. 2025

- Built cross-platform fitness tracking application for Android and iOS using Flutter framework
- Integrated Google Firebase for real-time database management and user authentication
- Implemented workout logging, progress tracking, and data visualization features
- Created responsive UI with custom widgets and seamless navigation for enhanced user experience

TECHNICAL SKILLS

Backend Technologies: Node.js, C++, C#, .NET, Express.js, Nest.js, RESTful APIs, SQL

Frontend Technologies: Next.js, React.js, HTML5, CSS3, JavaScript (ES6+), Flutter, Blazor

Databases: MongoDB, Firebase, MySQL, PostgreSQL

Tools & Platforms: Git, VS Code, Shopify, Firebase Console, Postman, Docker

Cloud & Deployment: Firebase Hosting, Heroku, Netlify, Google Cloud Platform
